

SURGI♥SUPPORT VEST™

FOR WOMEN

Promotes Healing

♥ **Front Closure Provides:**

- Easy access to the incision and dressing
- Easy placement and removal
- Eliminates placement issues with a conventional sports bras
- No Rear hooks requiring excessive movement of the patient and difficulty accessing the wound

♥ **Immediate Support to Wound Site Promotes Healing:**

- Eliminates breast tissue pulling or tugging on the incision
- Provides support for large breasted women
- Soft 90% cotton and 10% spandex material allow placement on the patient in the surgery suite at the completion of surgery

♥ **Surgi Support Vest Velcro Closure Provides:**

- Variable tension is useful as the dressing size decreases and the wound heals, vest can be adjusted to provide additional support
- Eliminates hooks that can catch, pull or dislodge dressing

♥ **Psychological Benefit for Women After Surgery:**

- Patients feel better about themselves wearing Surgi Support Vest as compared to a large dressing
- Patients who feel better are positive about surgical outcome

♥ **Surgi Support Vest should be worn in conjunction with Heart Hugger Sternum Support Harness for maximum Sternal Support**

SURGI-SUPPORT VEST™

FOR WOMEN

Promotes Healing

- ♥ **Breast wrap** supports ribs, sternum, and breast tissue after open heart or thoracic surgeries, especially those complicated by obesity, large breasts or excess fatty tissue. To increase patient comfort and pain management, Surgi-Support Vest should be worn in conjunction with Heart Hugger Sternum Support Harness.
- ♥ **Immobilizes side and breast tissue** – no need for tapes, t-shirts or support packs.
- ♥ **Reduces risks of wound complications** by supporting breast tissue, prohibiting the “tug” on sternotomy wounds.
- ♥ **Promotes patient confidence** in maintaining normal posture and mobility.
